

Lessons Learned

Description

This content area describes lessons learned as a result of actual project experience. Lessons learned can be both positive and negative. We have the opportunity to learn about techniques and approaches that can be followed on future projects, as well as pitfalls to be avoided.

Most Recently Updated Articles [Ordered by Last Modified Date]

Name	Version Creation Time	Abstract
Tooling in Support of Common Criteria Evaluation of a High Assurance Operating System	5/16/08 2:39:03 PM	This article describes the technical motivation behind a project to develop a high assurance operating system for smart cards, the lessons we learned, our suggestions for tools for anyone courageous enough to undertake such an effort in the future, and a summary of our findings. A final section discusses the impact of the project, its current state, and anticipated future work.
